EXPERIENCE

Pivotal/VMware, Santa Monica — Senior Software Engineer

Oct 2018 - Present

Full time OSS contributor working on platform networking concerns both in Cloud Foundry and Kubernetes. Contribute to both Istio and Contour, and architect integration with and higher level abstractions for kubernetes ingress networking. After VMware acquires Pivotal, deliver cf-for-k8s with ingress and mesh networking capabilities.

Appfolio, San Diego — Software Engineer

Jan 2015 - May 2018

Full stack development using Ruby on Rails and React on one of the largest legacy Rails apps. Work on a small agile team building features based on customer needs. Collect and act on feedback from customers including customer calls and user testing. Participate in group design activities including internal stakeholders and customers. Advocate for agile software development principles including facilitating retrospectives. Lead the team in architectural decisions. Load and maintain the office kegerator.

Outside Open, Santa Barbara — Programmer

May 2014 - Jan 2015

Designed and implemented software tools for clients and in-house use in Ruby on Rails, Python Flask, and Wordpress. Built bespoke solutions for clients, from hardware to custom software. Provided ongoing IT support and site management.

EDUCATION

Westmont College, Santa barbara, CA — BS Computer Science

Sept 2011 - Dec 2014

Included classes in Scheme, Ruby/Rails, Software Development practices, Database Design, Graphics, Operating systems, Programming Languages, and Networks.
